WFH Humanitarian Aid Program The lack of access to care and treatment in developing countries is an urgent and

important public health challenge. The WFH is leading the effort to change this lack of access by providing consistent and predictable treatment for all people with inherited bleeding disorders.

Haemophilia - Wikipedia

Haemophilia is a mostly inherited genetic disorder that impairs the body's ability to make blood clots, a process needed to stop bleeding. This results in people bleeding longer after an injury, easy bruising, and an increased risk of bleeding inside joints or the brain. Those with a mild case of the disease may have symptoms only after an
