From discussions of general philosophy to practical methods for system analysis. Unfortunately, much of the existing research is scattered. The practitioner interested in these methods face the challenge of sorting through a vast amount of literature to find a core on which to build. One of the objects of this book was to facilitate communication by bringing together different viewpoints

IEEE Xplore: IEEE Transactions on Fuzzy Systems

The IEEE Transactions on Fuzzy Systems (TFS) is published monthly. TFS will consider papers that deal with the theory, design or an application of fuzzy systems ranging from hardware to software.

Fuzzy Sets and Systems - Journal - Elsevier

Since its launching in 1978, the journal Fuzzy Sets and Systems has been devoted to the international advancement of the theory and application of fuzzy sets and systems. The theory of fuzzy sets now encompasses a well organized corpus of basic notions including (and not restricted to) aggregation operations, a generalized theory of relations, specific measures of information content, a Fuzzy Logic - Applications

What is Fuzzy Logic System - Operation, Examples ... Fuzzy Logic is a logic or control system of an n-valued

logic system which uses the degrees of state degrees of truth of the inputs and produces outputs which depend on the states of the inputs and rate of change of these states (rather than the usual true or false (1 or 0), Low or High

One straightforward application of fuzzy sets is the re-examination of the idea of significant figures. From a fuzzy viewpoint, $x = 3.5$ means x is an element of a fuzzy set whose membership function is 1 between 3.45 and 3.55 and 0 elsewhere. $y = 3.49$ means y is an element of another fuzzy set whose membership function is 1 between 3.485 and 3.495 and 0 elsewhere. i is a one of the fuzzy set of the fuzzy partition for y For a given pair of crisp input values x_1 and x_2 the antecedents are the degrees of membership obtained during the fuzzification: $A_1 j(x_1)$ and $A_2 k(x_2)$.
