[Prognosis and survival for bladder cancer - Canadian ...](#)

Bladder cancer can come back, or recur. Recurrent bladder cancer still has a good prognosis because it rarely grows deeply into the bladder wall. Grade. The lower the grade, the more favourable the prognosis. High-grade tumours have a greater risk of disease progression and a less favourable prognosis. Doctors usually describe bladder tumours as high grade or low grade, but many pathologists still use a 3-point or 4-point grading system.

[Treatment of Bladder Cancer, by Stage](#)

The long-term outlook for stage 0is (flat non-invasive) bladder cancer is not quite as good as for stage 0a cancers. These cancers have a higher risk of coming back, and may return as a more serious cancer that is growing into deeper layers of the bladder or has spread to other tissues.

[Bladder Cancer Staging | Bladder Cancer Stages](#)

After someone is diagnosed with bladder cancer, doctors will try to figure out if it has spread, and if so, how far. This process is called staging. The stage of a cancer describes the extent of the cancer in the body. It helps determine how serious the cancer is and how best to treat it.

[Bladder Cancer - Treatment for Stage 0 - HTQ](#)

The long-term outlook for stage 0is (flat non-invasive) bladder cancer is not quite as good as for stage 0a cancers. These cancers have a higher risk of coming back, and may return as a more serious cancer that is growing into deeper layers of the bladder or has spread to other tissues.

[Prognosis and survival for bladder cancer - Canadian ...](#)

People with bladder cancer may have questions about their prognosis and survival. Prognosis and survival depend on many factors. Only a doctor familiar with a person's medical history, type of cancer, stage, characteristics of the cancer, treatments chosen and response to treatment can put all of this information together with survival.

[Bladder cancer - Wikipedia](#)

Bladder cancer is any of several types of cancer arising from the tissues of the urinary bladder. It is a disease in which cells grow abnormally and have the potential to spread to other parts of the body.

[Bladder Cancer Symptoms, Stages, Treatment - OnHealth](#)

Bladder cancer is the growth of abnormal or cancerous cells on the inner lining of the bladder wall. Most bladder cancers are detected at early stages when the tumor has not spread outside the bladder and treatments are successful.
