Combustion Engines are the third tier of Engine, and the most powerful in BuildCraft itself, although some engines in other mods surpass them. They are crafted from iron, making them the most expensive of the BuildCraft engines.

[internal-combustion engine | Definition & Facts ...](#)

Internal-combustion engine, any of a group of devices in which the reactants of combustion (oxidizer and fuel) and the products of combustion serve as the working fluids of the engine. Such an engine gains its energy from heat released during the combustion of the nonreacted working fluids, the oxidizer-fuel mixture.

[Internal combustion engine - Wikipedia](#)

An internal combustion engine (ICE) is a heat engine where the combustion of a fuel occurs with an oxidizer (usually air) in a combustion chamber that is an integral part of the working fluid flow circuit.
