Here z is a complex number, and the limit is to be interpreted with the topology on \mathbb{C} induced by the norm $\|z\|$. (This is the same topology as on \mathbb{R}^2 .) Remark. It turns out that \mathbb{C} differentiable functions and power series are actually the same! We will see what this is later. Example. The usual tricks for differentiation in \mathbb{R} will work for \mathbb{C} too, for example, all polynomials are differentiable, and one
