[What is a Content Delivery Network \(CDN\)?](#)

Choosing a Content Delivery Network Websites owners face questions about which type of network to choose.

Customers can choose from Internet-based or private networks, and some networks integrate with Online Video Platform, enabling features that enhance video distribution.

[What is CDN \(content delivery network\)? - Definition from ...](#)

A CDN (content delivery network), also called a content distribution network, is a group of geographically distributed and interconnected servers that provide cached internet content from a network location closest to a user to accelerate its delivery.

[What Is A CDN? A Beginner's Guide To Content Delivery Networks](#)

A CDN, which stands for Content Delivery Network, is a global network of servers that deliver content to visitors of a website based on where that visitor is located. You need to understand how regular web hosting works in order to understand this definition as well as the importance of it.

[What is a content delivery network \(CDN\)? - Azure ...](#)

A content delivery network (CDN) is a distributed network of servers that can efficiently deliver web content to users. CDNs store cached content on edge servers in point-of-presence (POP) locations that are close to end users, to minimize latency.

[Content Delivery Network - All About CDNs in One](#)

Place ...

A Content Delivery Network (CDN) is a globally distributed network of web servers whose purpose is to provide faster delivery, and highly available content. The content is replicated throughout the CDN so it exists in many places all at once. A client accesses a copy of the data near to the client, as opposed to all clients accessing the same central server, in order to avoid bottlenecks near
