Early gastric cancer (EGC) is defined as invasive gastric cancer that invades no more deeply than the submucosa, irrespective of lymph node metastasis (T1, any N).

[Prognosis and survival for bladder cancer - Canadian ...](#)

The following are prognostic and predictive factors for bladder cancer: Type of tumour. The prognosis is different for each type of bladder cancer. Papillary urothelial carcinomas of the bladder have the best prognosis. Small cell carcinoma tends to have a poorer prognosis. Stage. The stage of bladder cancer is an important prognostic factor. The lower the stage, the more favourable the prognosis. The deeper the cancer has grown into the bladder wall or surrounding tissue, the less

[Gastric cancer after gastric bypass with fundectomy: The ...](#)

Discussion: Early diagnosis is essential in gastric tumors to ensure a good prognosis and the gold standard is performing gastroscopy with biopsies. With the standard technique is very challenging to perform an OGD and the cancer stage is likely to be advanced at diagnosis, with a bad prognosis for the patient.

[Upgrading the definition of early gastric cancer: better ...](#)

Introduction. Early gastric cancer (EGC) is commonly

reported in Japan^{1, 2} because of the widespread use of organized screening programs. However, the number of EGC cases is apparently rising in other parts of the world³⁻⁶.

Signs and Symptoms of Stomach Cancer

Early-stage stomach cancer rarely causes symptoms. This is one of the reasons stomach cancer is so hard to detect early. The signs and symptoms of stomach cancer can include: Most of these symptoms are more likely to be caused by things other than cancer, such as a stomach virus or an ulcer. They
