The overconfidence effect is a well-established bias in which a person's subjective confidence in his or her judgements is reliably greater than the objective accuracy of those judgements, especially when confidence is relatively high.

[24-hour analog clock Wiki LOGre](#)

This is DIY, analog, 24-hour, one handed wall clock. The sole hand points downwards at midnight and upwards at noon, so that its movements mimics the path of the Sun in the sky. We can optionally stick a piece of paper on the clock's face, with drawings evocative of day and night activities.
