[The Management of Human Pharmaceuticals in the Environment](#)

Abstract: Pharmaceuticals and their metabolites, collectively known as pharmaceutically active compounds (PhACs), have been detected in surface water, groundwater, and drinking water, in a number of countries,

since the mid-1990s.

Pharmaceuticals in the environment | European Commission

The text addresses pharmaceuticals for human as well as for veterinary use. The areas cover all stages of the lifecycle of pharmaceuticals, from design and production to disposal and waste management, in line with the principles of the staff working document of the Commission on Sustainable Products in a Circular Economy .

Pharmaceuticals and the Environment | Public Health

Pharmaceuticals and the Environment Environmental Pollution caused by human and veterinary pharmaceutical substances is an emerging environmental problem. Article 8e of Directive 2008/105/EC (amended by Directive 2013/39/EU) obliges the European Commission to develop a strategic approach to water pollution from pharmaceutical substances.
