Inflation is a quantitative measure of the rate at which the average price level of a basket of selected goods and services in an economy increases over a period of time.
[Is inflation a monetary phenomenon? - Quora](#)
Inflation isn't necessarily a monetary phenomenon; it is only calculated as a monetary sense to establish a relative comparison. Inflation is more of a Supply and Demand Gap concept, where supply is relatively lesser than demand, the price thus commanded by the commodity goes higher.

What methods can the government use to control inflation?

One popular method of controlling inflation is through a contractionary monetary policy. The goal of a contractionary policy is to reduce the money supply within an economy by decreasing bond

[Inflation - Wikipedia](#)

In economics, inflation is a sustained increase in the general price level of goods and services in an economy over a period of time. When the general price level rises, each unit of currency buys fewer goods and services; consequently, inflation reflects a reduction in the purchasing power per unit of money a loss of real value in the
