Business Intelligence and Analytics for Value Creation in the Era of Big Data and Linked Open Data In contrast to traditional database applications, the process of building Business Intelligence (BI) applications is complex, expensive, and time-consuming.

Are you ready for the era of big data ? | McKinsey

The era of big data also could yield new management principles. In the early days of professionalized corporate management, leaders discovered that minimum efficient scale was a key determinant of competitive success.

Likewise, future competitive benefits may accrue to companies that can not only capture more and better data but also use that data effectively at scale. We hope that by **NETWORKING SESSION 1: Big data research (ICT 16) Room: AB-0A**
