Oil pressure depends on the engine--my Cummins ISX runs at 40psi, some Detroit's run at 50 and so on. If you're coming from empty tanks, you should see the Low Air light go out within two to three

### **Symptoms of a Bad or Failing Oil Pressure Sensor**

The oil pressure gauge inside your car will give you a good indication as to the condition of the engine's oil levels. If the Low Oil Light comes on, but you check the oil in the engine and it's at a good level, then a faulty oil pressure sensor may be to blame. When this sensor goes bad, it will start to give inaccurate readings.

### **09 Cummins ISX 435 ST Low Oil Pressure TruckersReport**

The low oil pressure is usually temporarily corrected by a filter change. Usually leaking EGR valves throw EGR temp too high, Turbo inlet temp too high and can cause excessive regens. Usually the first thing to do is make sure your EGR differential pressure sensing tubes are clean, and that the venturi pipe is also clear so the EGR differential pressure sensor is reading correctly.

I've heard oil pressure in cummins isx is between 20-40 but what I'm saying is when the warning light and high engine exhaust temperature light comes on and a 600 horsepower cummins can't get over a small mountain going no more than 15 miles per hour something is wrong with that cummins had no problems with a cat pulling same mountain

### **Where Is the Oil Pressure Sensor Located in a Cummins**

The oil pressure sensor on a Cummins engine is located behind the ECM harness on the driver's side. To get to it, remove the fuel filter housing and loosen the Allen bolt from the ECM harness. Replacing the oil pressure sensor will solve the problem of a gauge not correctly measuring the oil pressure within the engine.

### **What Is an Oil Pressure Sensor AxleAddict**

As the oil is circulated by the automotive oil pump it passes through an engine oil pressure sensor, also called an oil pressure sender. This sensor checks whether the pressure is within the manufacturer's recommended limits and sends a signal to the oil pressure gauge or oil pressure warning light on the dashboard to notify the driver that there is a problem.
