Construction Cost Indices Their Creation and Use

Most construction indices are built using the cost of the inputs a representative selection of labor, material and equipment. Notice the distinction, cost of the inputs, not price of the output. It is essential to remember that a cost index measures the price movement for some objects over time and/or location using a series of values.

Construction Inflation Cost Index Construction Analytics

Long term construction cost inflation is normally about double consumer price inflation. Construction inflation in rapid growth years is much higher than average long-term inflation. Since 1993, long-term annual construction inflation for buildings has been 3.5%/yr., even when including the recessionary period 2007-2011.
