Abstract. Surgical resection is the primary method of obtaining a potential cure for patients with gastric adenocarcinoma. However, chemotherapy or chemoradiotherapy offer signifi

[Multimodality Treatment of T4 Gastric Cancer in the United ...](#)

Background National guidelines advocate use of multimodality therapy (MMT) for treatment of T4 gastric cancer (T4GC). Prior studies demonstrate poor compliance with these guidelines. We sought to

[Multimodality Therapy of Localized Gastric Adenocarcinoma](#)

Surgical resection is the primary method of obtaining a potential cure for patients with gastric adenocarcinoma. However, chemotherapy or chemoradiotherapy offer significant improvement in survival over surgery alone. Much of the difficulty in deciding the optimal treatment strategy is choosing between perioperative chemotherapy or adjuvant chemoradiotherapy. Adding to the complexity is the

[Multimodality Treatment of Gastric Lymphoma](#) [Multimodality Treatment of Gastric Lymphoma 407](#)

TREATMENT Although the treatment strategy for nodal NHL is well established, treatment of gastric lymphoma is not without controversy.²⁵ Historically, surgical excision of gastric lymphomas had been the mainstay of treatment; many studies have shown longer survival with primary resection.^{31–33} Antibiotic therapy for low-grade, early-stage

Multimodality Therapy for Gastric Cancer | SpringerLink

Recent clinical trials of adjuvant therapy for gastric cancer in Japan have shown improved survival benefits, but the results have been considered controversial and have been viewed with some skepticism in the West. Until now, the efforts of Japanese surgical oncologists in multimodality therapy have not been fully understood because they have not been adequately reported in English. This

Multimodality management of resectable gastric cancer: A ...

Core tip: Gastric adenocarcinoma is a difficult disease to treat. Surgical resection is the definitive therapy but recurrences are frequent. The use of a multidisciplinary approach to treatment decision-making is imperative.
