**One-of-a-kind Product Design and Manufacture**  
 Colored Petri-net was employed for simulation of this one-of-a-kind production system. A method to predict manufacturing resource requirement based on the prediction of the sales was introduced. Neural networks were employed to model the non-linear relations between sales of different products and requirements of manufacturing resources.

production and complex assembly including outfitting. 1 INTRODUCTION The production process in shipbuilding is defined by the complex product ship. A ship can be considered as a one-of-a-kind product even in small series due to constant changes of design and building method. Therefore, production development as well as production planning and control feature specific requirements in Production planning and control in a virtual One-of-a-Kind ...

Today, the manufacturing industry, particularly the OKP (One-of-a-Kind Production) industry, tends to be lean.

agile and global. This tendency leads to a new concept of a virtual company that consists of several subproduction units geographically dispersed in the world as branches, joint ventures and subcontractors.
