#### [Difference Between Risk and Uncertainty \(with Comparison ...](#)

The difference between risk and uncertainty can be drawn clearly on the following grounds: The risk is defined as the situation of winning or losing something worthy. Uncertainty is a condition where there is no knowledge about the future events.

#### [Economic Policy Uncertainty Index](#)

The index is associated with greater economic policy uncertainty (EPU), stock market volatility, risk and lower GDP growth. Results from a Vector autoregression (VAR) analysis for a panel of 46 countries show that innovations in the WUI foreshadow significant declines in output. Economic Policy Uncertainty and the Yield Curve policy uncertainty leads to a decline in yields and an increase in bond yield volatility, whereas monetary policy uncertainty has no significant contemporaneous effect on yields nor volatilities. However, it is an important predictor for bond risk premia.

#### **Risk, uncertainty and monetary policy - ScienceDirect**

The effects of monetary policy on uncertainty are similar but somewhat weaker. On the other hand, periods of both high uncertainty and high risk aversion are followed by a looser monetary policy stance but these results are less robust and weaker statistically. Finally, it is the uncertainty component of the VIX that has the statistically stronger effect on the business cycle, not the risk
