African trypanosomiasis - Wikipedia

African trypanosomiasis, also known as sleeping sickness, is an insect-borne parasitic disease of humans and other animals. It is caused by protozoa of the species *Trypanosoma brucei*. There are two types that infect

humans, *Trypanosoma brucei gambiense* (TbG) and *Trypanosoma brucei rhodesiense* (TbR). TbG causes over 98% of reported cases.

[What is African sleeping sickness? | Facts | yourgenome.org](#)

African trypanosomiasis, or sleeping sickness, is caused by *Trypanosoma brucei* parasites in sub-Saharan Africa and is transmitted by the tsetse fly (*Glossina*). American trypanosomiasis, or Chagas disease, is caused by *Trypanosoma cruzi* parasites in Latin America and is transmitted by the triatomine or kissing bug.

#### **Epidemiology of human African trypanosomiasis**

Human African trypanosomiasis (HAT), or sleeping sickness, is caused by *Trypanosoma brucei gambiense*, which is a chronic form of the disease present in western and central Africa, and by *Trypanosoma brucei rhodesiense*, which is an acute disease located in eastern and southern Africa.

#### **Human African trypanosomiasis - The Lancet**

Human African trypanosomiasis (sleeping sickness) is a parasitic infection that almost invariably progresses to death unless treated. Human African trypanosomiasis caused devastating epidemics during the 20th century.

[Progress in human African Trypanosomiasis, sleeping ...](#)

[Download Citation on ResearchGate | On Jan 1, 2000, John Baker and others published Progress in human African Trypanosomiasis, sleeping sickness: M. Dumas, B. Bouteille & A. Buguet \(editors\).](#)

#### **Human African trypanosomiasis - PubMed Central (PMC)**

Human African trypanosomiasis or sleeping sickness is one of the most important but equally most neglected tropical infections. It is caused by a protozoan,

*Trypanosoma brucei*, which is transmitted to humans through the bite of a tsetse fly (*Glossina* spp).

#### **CDC - African Trypanosomiasis - Disease**

The clinical course of human African trypanosomiasis has two stages. In the first stage, the parasite is found in the peripheral circulation, but it has not yet invaded the central nervous system.

#### **Report of a WHO Informal Consultation on sustainable ...**

Since then, impressive progress has been made in controlling human African trypanosomiasis (HAT, or sleeping sickness), transforming the epidemiology of the disease described in 1996.
