[Shock wave - Wikipedia](#)

In physics, a shock wave (also spelled shockwave), or shock, is a type of propagating disturbance that moves faster than the local speed of sound in the medium.

[Shock Waves The Physics Hypertextbook](#)

Unlike ordinary sound waves, the speed of a shock wave varies with its amplitude. The speed of a shock wave is always greater than the speed of sound in the fluid and decreases as the amplitude of the wave decreases. When the shock wave speed equals the normal speed, the shock wave dies and is reduced to an ordinary sound wave.

A sound wave is a limiting case of a shock wave, in which the pressure discontinuity across the shock tends to zero. The disturbances are effectively assumed to be infinitesimal in the treatment of sound waves, and there is no change of entropy du
