Soft computing - Wikipedia

In computer science, soft computing (sometimes referred to as computational intelligence, though CI does not have an agreed definition) is the use of inexact solutions to computationally hard tasks such as the solution of NP-complete problems, for which there is no known algorithm that can compute an exact solution in polynomial time. <https://www.editorialmanager.com/soco/default.aspx> We would like to show you a description here but the site won't allow us.
