Sharepoint and The Hard Systems Model Of Change

The Hard Systems Model of Change is a method for designing and implementing change in situations that have the characteristic of hard complexity. These are situations where the problems are understood and agreed by most people. The quantitative criteria can be used to test options for change. The more simple systems prevail. There is often a unitary ideology of relationships that prevail. This 2. Systems, Models, and Simulation

Chapter 2: Systems, Models, and Simulation - A few definitions . . . A system is a simplified representation of reality. "System" is a common word, often used with loose meaning. Whereas in the real world, a "system" may seem at times an endless series of connected elements, we refer here to a system as (1) a series of selected, chosen
