The Extra-Intracranial Bypass Operation for Prevention and ...

The development of such intricate vasculosurgical techniques as are required for extra-intracranial arterial bypass operations would not have been possible without the aid of the surgical microscope, which had been designed some years earlier. In the past few years increasing emphasis has been placed on establishing clear-cut indications for the bypass operation, because satisfactory long-term results are unlikely to be obtained without them. Needless to say that this requires a close

The so-called Toronto Bypass Study was designed to evaluate the effectiveness of extra-intracranial bypass surgery for stroke prevention but it did not prove its effectiveness in this regard.

II. Indications for Extra-Intracranial Bypass Procedure ...

Indications for Extra-Intracranial Bypass Procedure: Pathological-Anatomical Considerations Pathological changes alone are not a sufficient indication for an extra-intracranial bypass operation. Pathological changes must always be considered in relation to the clinically symptoms. Thus if the patient does not have any TIA in his case history nor any neurological symptoms, and if scintigraphy

Extraintracranial Bypass as a Rescue Therapy for ...

The patient underwent a double-barrel extraintracranial bypass. The postoperative course was uneventful and she has experienced no further ischemic events to date. 1.

Introduction. There is increasing evidence that the flow diverters (FDs) are changing the classical treatment paradigm of cerebral aneurysms, from the occlusion of the sac to the reconstruction and healing of the vessel wall.

Long-Term Control of Completed Stroke: rCBF Measurements ...

The indication for extra-intracranial bypass operation in transient ischemic attacks (TIA) is undisputed. By contrast, since the chance of the operation being successful in completed stroke is reduced owing to severe morphological changes, the question of whether to operate remains a subject of discussion (2, 4, 6). However, we have observed that despite severe neurological disorders, the
